

MoSCoW Prioritised User Stories

Fitness & Diet App — 20 User Stories with Acceptance Criteria

Must Have ● MVP Core — US-01 to US-07

US01 As a user, I want to create custom workout routines so that I can tailor my fitness plan to my goals.

ACCEPTANCE CRITERIA

Given	The user is logged in and on the Create Workout screen.
When	The user enters a name, adds at least one exercise with sets, reps, and rest time, and taps Save.
Then	The workout is saved, appears in the user's routine list, and can be retrieved in a later session.

US02 As a user, I want to log completed workouts so that I can track my activity.

ACCEPTANCE CRITERIA

Given	The user has an existing workout routine and is on the Log Workout screen.
When	The user selects a routine, enters actual sets, reps, and weights performed, and taps Complete.
Then	A timestamped workout entry is saved to history and the user sees a confirmation summary.

US03 As a user, I want to add exercises with sets, reps, and weight so that my workouts are detailed and accurate.

ACCEPTANCE CRITERIA

Given	The user is creating or editing a workout routine.
When	The user adds an exercise and fills in the sets, reps, and weight fields.
Then	The exercise entry is saved with all specified values and displayed correctly within the routine.

US04 As a user, I want to edit or delete a workout entry so that I can correct mistakes.

ACCEPTANCE CRITERIA

Given	The user has at least one saved workout entry in their history.
When	The user opens an entry, modifies the details or taps Delete and confirms the action.
Then	The updated entry reflects the changes immediately, or the deleted entry is removed from the list.

US05 As a user, I want to view my past workouts so that I can monitor progress.

ACCEPTANCE CRITERIA

Given	The user has at least one logged workout in their history.
When	The user navigates to the Workout History screen.
Then	A chronological list of past workouts is displayed, each showing the date, exercises, and performance data.

US06 As a user, I want to view my weekly workout summary so that I can see my consistency.

ACCEPTANCE CRITERIA

Given	The user has logged workouts within the current or past week.
When	The user opens the Weekly Summary view.
Then	A summary shows total sessions, total volume, and active days for the selected week.

US07 As a user, I want to record my daily calorie intake so that I can manage my nutrition.

ACCEPTANCE CRITERIA

Given	The user is logged in and on the Nutrition Log screen.
When	The user adds a meal entry with a name and calorie value.
Then	The entry is saved under the current date and the daily calorie total updates automatically.

Should Have ● High Value — US-08 to US-13

US08 As a user, I want access to an exercise library so that I can easily build workouts.

ACCEPTANCE CRITERIA

Given	The user is on the Add Exercise screen while creating or editing a workout.
When	The user searches or browses the exercise library and selects an exercise.
Then	The selected exercise, including its instructions and target muscle groups, is added to the workout.

US09 As a user, I want to set workout and calorie goals so that I can stay motivated.

ACCEPTANCE CRITERIA

Given	The user is on the Goals screen.
When	The user defines a weekly session target and a daily calorie target, then saves.
Then	The goals are stored, linked to tracking data, and visible on the dashboard with current progress.

US10 As a user, I want to see my progress toward goals so that I stay informed and motivated.

ACCEPTANCE CRITERIA

Given	The user has set at least one fitness or calorie goal.
When	The user opens the Progress screen.
Then	Progress bars and charts display current achievement vs targets, and any completed goals are highlighted.

US11 As a user, I want to see my calorie trends so that I can adjust my diet.

ACCEPTANCE CRITERIA

Given	The user has logged calorie entries for at least one day.
When	The user opens the Calorie Overview screen.
Then	A chart shows daily and weekly intake trends, and the view compares actual intake against the user's goal.

US12 As a user, I want to edit or delete calorie entries so that I can correct my food log.

ACCEPTANCE CRITERIA

Given	The user has at least one calorie entry logged for the current or a past date.
When	The user taps an entry, edits the meal name or calorie value, or confirms deletion.
Then	The entry is updated or removed, and the daily total recalculates immediately.

US13 As a user, I want to track my body measurements so that I can see physical changes over time.

ACCEPTANCE CRITERIA

Given	The user is on the Measurements screen.
When	The user enters a measurement value (e.g., weight or body fat percentage) and saves.
Then	The measurement is logged with a date stamp and the history view shows a trend over time.

Could Have ● Nice to Have — US-14 to US-18

US14 As a user, I want to choose from preset workout templates so that I can start quickly.

ACCEPTANCE CRITERIA

Given	The user is on the Create Workout screen and has not yet added any exercises.
When	The user selects a preset template (e.g., Full Body Strength) from the templates list.
Then	The template's exercises, sets, and reps are pre-filled into the routine, which the user can then edit.

US15 As a user, I want to receive workout reminders so that I don't forget my sessions.

ACCEPTANCE CRITERIA

Given	The user has enabled notifications and configured a reminder time in Settings.
When	The scheduled reminder time is reached.

Then	The user receives a notification prompting them to log their workout session.
-------------	---

US16 As a user, I want AI-generated workout suggestions so that I can improve my routine.

ACCEPTANCE CRITERIA

Given	The user has logged at least three workouts and has an active fitness goal.
When	The user opens the Suggestions screen.
Then	The system displays a suggested workout with exercises, sets, and reps based on the user's history and goals.

US17 As a user, I want feedback on my workouts and the ability to adjust suggestions so that I stay in control.

ACCEPTANCE CRITERIA

Given	The user has received an AI-generated workout suggestion.
When	The user reviews the feedback summary and edits one or more exercises before saving the suggestion.
Then	The adjusted workout is saved to the user's routines, and future suggestions reflect the user's modifications.

US18 As a user, I want to filter my workout history by date or type so that I can find specific sessions.

ACCEPTANCE CRITERIA

Given	The user is on the Workout History screen with multiple logged sessions.
When	The user applies a filter by date range or workout type.
Then	Only the matching sessions are displayed, and clearing the filter restores the full history list.

Won't Have (this time) ● Out of Scope — US-19 to US-20

US19 As a user, I want to connect a wearable device so that my activity data syncs automatically.

ACCEPTANCE CRITERIA

Given	The user has a supported wearable (e.g., Garmin, Apple Watch) and is on the Integrations screen.
When	The user authenticates with their wearable account and grants data access.
Then	Activity data from the wearable syncs to the app and appears in the user's workout history automatically.

US20 As a user, I want to share my progress with friends or a coach so that I can stay accountable.

ACCEPTANCE CRITERIA

Given	The user has logged progress data and is on the Share screen.
When	The user selects a contact or coach and chooses what data to share.
Then	The selected progress data is shared with the recipient, respecting the user's privacy settings.

US-19 and US-20 are explicitly deferred. Wearable integration and social/coaching features are recommended for a post-MVP roadmap once core tracking is stable.
