

Workout Management

User Story 1 – Create Workout Routine

As a user, I want to create custom workout routines so that I can tailor my fitness plan to my goals.

Acceptance Criteria:

- User can create a workout with a name and description
- User can add/remove exercises to the workout
- User can specify sets, reps, and rest time per exercise
- Workout is saved and accessible later
- Validation prevents saving empty workouts

User Story 2 – Edit/Delete Workouts

As a user, I want to modify or delete workouts so that I can keep my routines up to date.

Acceptance Criteria:

- User can edit workout details (name, exercises, sets, etc.)
- User can delete a workout with confirmation prompt
- Changes are saved immediately
- Deleted workouts are removed from the list

User Story 3 – Exercise Library

As a user, I want access to an exercise library so that I can easily build workouts.

Acceptance Criteria:

- User can browse/search exercises
- Exercises include instructions and muscle groups
- User can add exercises directly to a workout

- Library loads within acceptable time

Workout Tracking

User Story 4 – Log Workout Completion

As a user, I want to log completed workouts so that I can track my activity.

Acceptance Criteria:

- User can mark a workout as completed
- User can input actual sets/reps/weights
- Timestamp is automatically recorded
- Data is saved to workout history

User Story 5 – View Workout History

As a user, I want to view my past workouts so that I can monitor progress.

Acceptance Criteria:

- User can see a chronological list of workouts
- Each entry shows date, exercises, and performance
- User can filter by date or workout type
- Data persists across sessions

Calorie Tracking

User Story 6 – Log Calorie Intake

As a user, I want to record my daily calorie intake so that I can manage my nutrition.

Acceptance Criteria:

- User can input meals and calorie values
- Entries are grouped by date
- User can edit/delete entries
- Total daily calories are automatically calculated

User Story 7 – Calorie Overview

As a user, I want to see my calorie trends so that I can adjust my diet.

Acceptance Criteria:

- User can view daily/weekly calorie summaries
- Visual representation (e.g., charts) is available
- Data updates when new entries are added
- User can compare intake against goals

Goals & Progress

User Story 8 – Set Fitness Goals

As a user, I want to set workout and calorie goals so that I can stay motivated.

Acceptance Criteria:

- User can define goals (e.g., calories, workouts per week)
- Goals are saved and editable
- System validates reasonable input ranges
- Goals are linked to tracking data

User Story 9 – Track Progress

As a user, I want to see my progress toward goals so that I stay informed and motivated.

Acceptance Criteria:

- Progress is displayed visually (e.g., progress bars/charts)
- System updates progress automatically
- User can view progress over time
- Alerts/indicators show goal completion

AI-Inspired Recommendations

User Story 10 – Workout Suggestions

As a user, I want AI-generated workout suggestions so that I can improve my routine.

Acceptance Criteria:

- System generates suggestions based on user goals/history
- Suggestions include exercises, sets, and reps
- User can save or dismiss suggestions
- Suggestions update as user data changes

User Story 11 – Feedback & Adjustments

As a user, I want feedback on my workouts and the ability to adjust suggestions so that I stay in control of my plan.

Acceptance Criteria:

- System provides feedback (e.g., intensity, consistency)
- User can modify suggested workouts before saving
- Feedback is based on recent performance data
- System adapts future suggestions based on user adjustments
